The High School Assessment (HSA) in American government provides Maryland students with the opportunity to learn the Constitutional framework and democratic process that structure the State and national political system. American Government establishes a knowledge base which supports the development of skills needed for citizens in a participatory democracy. Effective citizens possess a clear understanding of government: its structure, its purposes, and its processes. They gather, communicate, and utilize information in order to evaluate the competing goals and varying points of view related to public issues. Utilizing their knowledge and skills, effective citizens purposely choose to be involved in their political system and exert influence in a participatory democracy. To assist students in acquiring these skills, the content of the course is arranged around five of the six state social studies standards:

Standard 1.0 Civics	Students will understand the historical development and current status of the fundamental concepts and processes of authority, power, and
	influence, with particular emphasis on the democratic skills and attitudes necessary to become responsible citizens.
Standard 2.0 Peoples of the Nations and World	Students will understand the diversity and commonality, human interdependence, and global cooperation of the people of Maryland, the United States, and the World through both a multicultural and historic perspective.
Standard 3.0 Geography	Students will use geographic concepts and processes to examine the role of culture, technology, and the environment in the location and distribution of human activities and spatial connections throughout time.
Standard 4.0 Economic	Students will develop economic reasoning to understand the historical development and current status of economic principles, institutions, and processes needed to be effective citizens, consumers, and workers participating in local communities, the nation, and the world.
Standard 6.0 Skills and Processes	Students shall use reading, writing, and thinking processes and skills to gain knowledge and understanding of political, historical, and current events using disciplinary and inquiry literacies.

Throughout the course, students should be employing the social studies skills and processes delineated in the 6.0 Skills and Processes standard. Organizing these skills is the Inquiry Arc which provides a structure to facilitate effective instruction in social studies.

The Inquiry Arc

Within the Inquiry Arc outlined in the 6.0 Skills and Processes document, students will be specifically assessed on the following skills:

- **CLG Expectation 6.1, Dimension 3:** The student will demonstrate the ability to evaluate sources and use evidence.
 - a. The student will evaluate the credibility of the sources by considering the authority, origin, type, context, and corroborative value of each source.
 - b. The student will identify credible, relevant information contained in sources.
- **CLG: Expectation 6.2, Dimension 4:** The student will demonstrate the ability to communicate and critique conclusions.
 - a. The student will construct arguments using precise and knowledgeable claims, with evidence from multiple sources, while acknowledging counterclaims and evidentiary weaknesses.

Structure of the Exam

Via multiple-choice and short and extended written responses, the High School Assessment will measure both students' understanding of the core content **and** the skills and processes outlined in the assessment limits. The exam will include four types of items:

Question Type	Multiple Choice Items	Brief Constructed Response Items	Technology-aided Items	Skill-centered stacked items
Description	Students will select their response to the question from four answer options.	Students must develop the answer to a question using information that can be found in a particular text or other stimulus material (map, political cartoon, and quote) as well as background information that they bring to the question.	These items, which will be developed in a multiple choice format, will require students to manipulate information on the computer screen in order to display their answer selection. This could involve highlighting text, moving statements into one of two categories, or listening to a speech and then answering a question.	These items will include both multiple choice and brief constructed response items that utilize the same stimulus materials and allow students to demonstrate understanding of the assessed skills outlined in the 6.0 Skills and Processes document.
Example	 Which of these is a characteristic of the United States system of government? A. State governments may choose to ignore national laws. B. The executive and legislative powers of government are combined into one branch. C. The executive branch of government can choose to dissolve the judicial branch. D. The powers of government are divided between the national and state governments. 	What is the difference between fiscal and monetary policy? • Which one would be more effective in bringing the economy out of a recession? • Include examples and details to support your answer. Weaving of Government Principles

The American Government course intentionally emphasizes the foundational principles of federalism, separation of powers, checks and balances, judicial review, representative democracy, limited government, rule of law, individual rights and responsibilities, consent of the governed, majority rule, popular sovereignty, and equal protection. These principles are introduced in the first unit and are revisited and assessed throughout the course. Students are expected to apply these principles to the outcome of Supreme Court decisions and the development and implementation of government policies.

Using this document

1. What is an enduring understanding?

An enduring understanding is the overarching, conceptual guidelines for the unit. Enduring understandings explain why this unit is important and connect important concepts and processes to history and the world today.

2. What is a unit question?

A unit question connects the big ideas in the enduring understandings and essential questions to the specific event and time period of study. Everything in the unit contributes to answering this question.

7. What is an assessment limit?

Assessment limits designate the topics that can have questions written to measure student understanding. If topics do not appear in the assessment limits, then students cannot be held accountable for knowing that information.

Structure and Origins of Government

Content Standards	1.0 Civics and 2.0 Peoples of the Nation and the World
Core Learning Goal	1.1 and 2.2.1
Skills and Processes	6.1.1, 6.1.2, 6.2.1

Unit Enduring Understanding: In the United States, principles and structures are employed to form a democratic system that serves the purposes of government and protects the rights and authority of citizens.

Unit Question. How do the principles and structures of the United States government assist and/or impede meeting the purposes of government while protecting the rights and authority of the citizens?

1	Content Topic	Essential Question	Indicator and Objectives	Assessment Limits
	Types of Government	Why do governments form?	The student will analyze advantages and disadvantages of various types of governments throughout the world by: Comparing and describing the advantages and disadvantages of direct, representative, presidential, and parliamentary democracies. Evaluating the advantages and disadvantages of limited and unlimited political systems. Comparing authoritarian and democratic sovernments on distribution of power, efficiency of decision making, maintaining public order, protecting intividual rights, and the ability to address a crisis. Compare types of political systems on: distribution of power, efficiency of decision making, maintaining public order, protecting individual rights, and the ability to address a crisis.

4. What is an Essential Question?

Essential questions help students unpack the big idea in the enduring understandings and social studies thinking skills. These are questions that can be asked and answered in different times and places.

5. What is an Indicator?

Indicator statements assist teachers in determining how to link specific content to be studied to the indicator and essential question.

3. What is a content topic?

The content topic indicates the umbrella under which several common topics are organized for study.

6. What is an Objective?

Objectives provide teachers with detailed information regarding what specific learning should occur.
