

CREATING VIRTUAL SCIENCE FIELD TRIPS

Experiencing the EHC Online in 2020-21: 6th Grade

Funded by a Maryland Nonprofit Recovery Initiative Grant from the Maryland Dept. of Housing and Community Development, the Evergreen Heritage Center education team created field trip lessons for 6th grade students. Below are photos from their lessons that investigate What Lies Beneath including the impact of acid mine drainage.

The top row of photos show the site of an EHC underground spring and how to collect and test ground water using the charts to the left. The bottom photo shows a model of an aquifer and how the aquifer can be tested for pollution.
