

2013

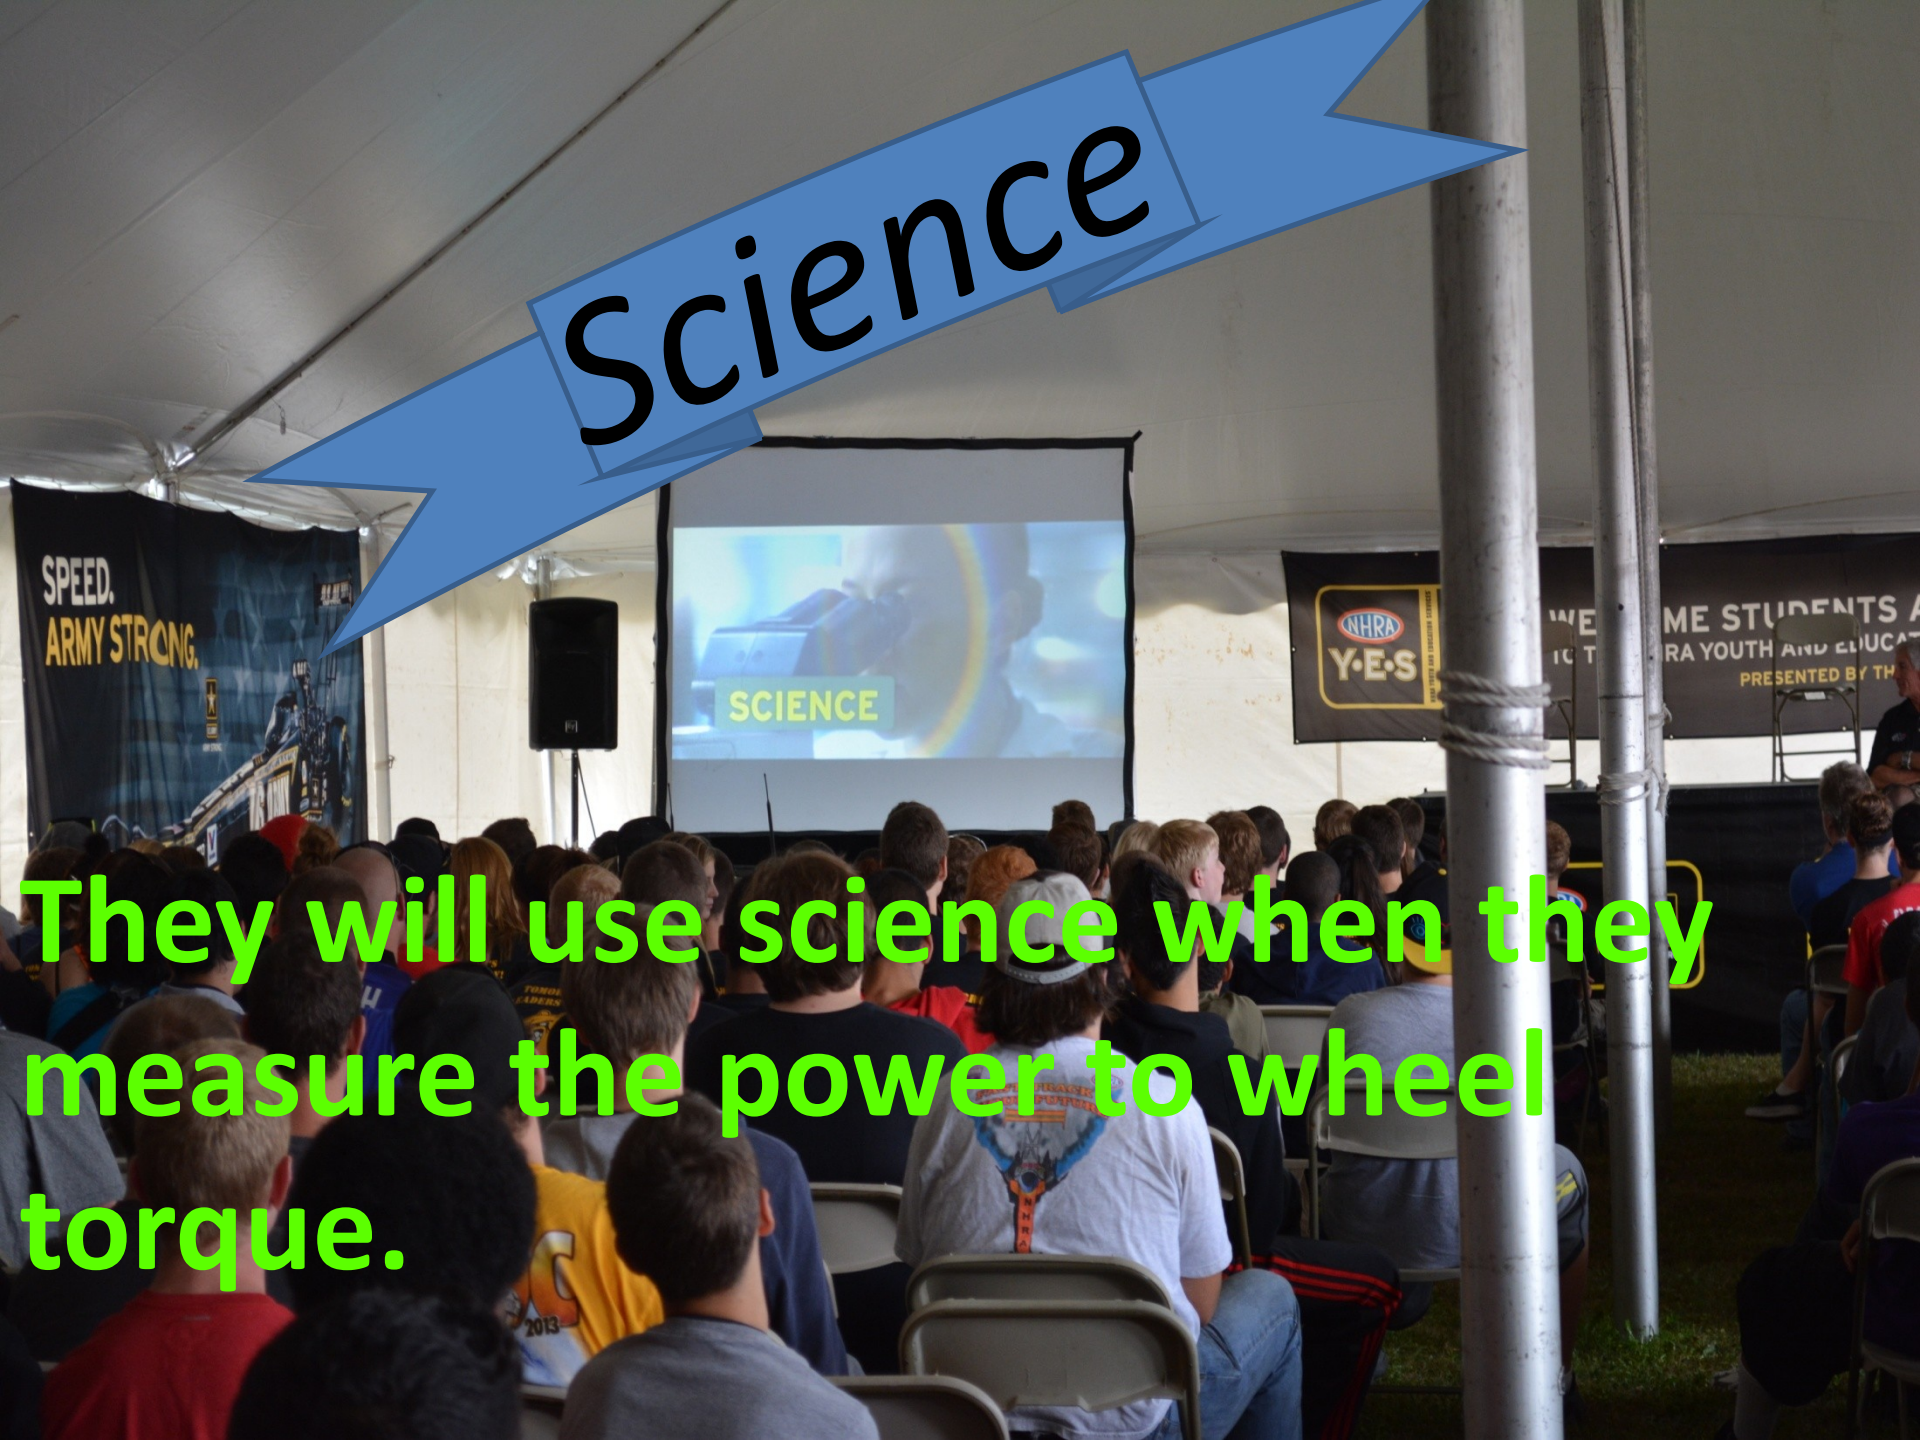

At the army presentation they explained the importance of STEM education.

Science

They will use science when they measure the power to wheel torque.

The use of engineering is applied in the use of aerodynamics.

Engineering

Technology

The use of technology in this car to have it go the speeds it does and handle the track is awesome.

You will use math in a everyday life in drag racing. They use it when they are mixing fuel, building cars, and gear ratio.

This trip was made possible by the U.S. ARMY, a STEM grant, and the NHRA National Hot Rod Association.

Thank You...
